# CPU-0550 Wi-Fi Enabled Boiler Control

BOILER STAGING - MIXING - PUMP SEQUENCER - DUAL & DIFFERENTIAL SETPOINT

Introducing the simplest, most intuitive control available to the hydronic industry, the CPU-0550. The control now incorporates the ThermoLinx™ Hydronic Network, allowing you to control your boiler system from the palm of your hand. The unique design means minutes to learn, minutes to setup. This control covers a wide variety of applications from a single unit, reducing the number of different controls on your shelf.

The CPU-0550 accommodates for boiler staging, system mixing, pump sequencer, dual and differential setpoint applications in a condensed package with extensive flexibility.

## Features

- Remote access via Apple® and Android™ products
- Alarm notification
- Up to 3 on/off boiler or single modulating boiler (0-10V)
- Multiple pump options (DHW, Boiler, System)
- Multiple mixing options
- Boiler lead lag and rotation
