CPU-0600 COMPARISON

The CPU-0600 is a Wi-Fi enabled boiler control that covers a wide variety of applications from a single unit, reducing the number of different controls on your shelf. The CPU-0600 accommodates for boiler staging, system mixing, pump sequencer, dual and differential setpoint applications in a condensed package with extensive flexibility.

In staging and mixing applications, the CPU-0600 can accommodate for multi boiler staging with outdoor temperature reset. The control can provide lead lag and boiler rotation on time or boiler cycles with capability of controlling Domestic hot water (DHW).

132	Pump Sequencer Stand-by / 2-Stage **CPU-0600**		**294**	Boiler Control - Four Stage Boiler & DHW & Setpoint & Mobile App **CPU-0600**
150	One Stage Setpoint Control **CPU-0600 OR THM-0100**		**356**	Mixing Control - Variable Speed **CPU-0600**
152	Two Stage Setpoint Control **CPU-0600/ THM-0100**		**360**	Mixing Control - Floating Action **CPU-0600**
153	Mixing Setpoint Control with Floating Action **CPU-0600**		**361**	Mixing Control - Variable Speed **CPU-0600**
156	Difference Setpoint Control **CPU-0600**		**374**	Boiler Reset – Two Boiler, Two Mixing & DHW & Setpoint **CPU-0600x2**
157	Difference Setpoint Control - Variable Speed **CPU-0600**		**400**	Boiler, DHW & Setpoint, Four Zone **CPU-0600 + ZON-0500**
256	Boiler Control - One Stage Boiler **CPU-0600/ ORC-0100**		**420**	Boiler Reset - Boiler, DHW & Setpoint **CPU-0600**
257	DHW Control - Two Stage **CPU-0600**		**421**	Mixing Reset Module **CPU-0600**
260	Boiler Control - One Stage Boiler & DHW **CPU-0600**		**422**	Reset Module - Mixing, Boiler, DHW & Setpoint **CPU-0600**
261	Boiler Control - Two Stage Boiler & Setpoint **CPU-0600**		**423**	Reset Module - Two Boiler, DHW & Setpoint **CPU-0600**
262	Boiler Control - Two Stage Boiler & DHW **CPU-0600**		**444**	Expansion Module – VPD Speed/ Floating Action/ Modulating **CPU-0600**
