# SOL-0100

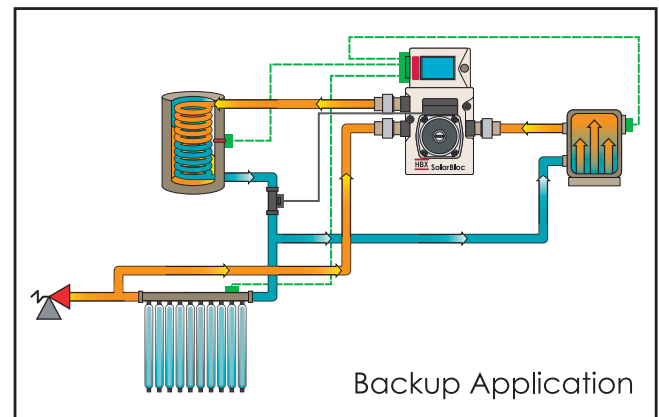

## SOL-0100 SolarBloc Control

The HBX SolarBloc is designed for solar tube and solar panel applications. Automatic differential is achieved using a variable speed pump and flow sensor.

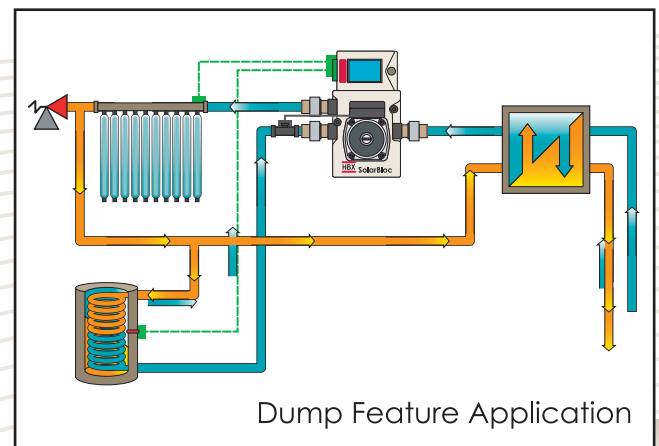

Built in features control either the boiler backup or provide capabilities for heat dump applications. Direct connect fittings allow contractors to reduce on-site installation times.

## Features

- Fully integrated control
- Automatic BTU calculations
- Integrated flow sensing
- Built-in air eliminator
- Runs either boiler backup or heat dump
- Delta T based variable speed pump control
- Multi-colour back-lit display
- Easy installation and commissioning
- Single dial programming and operation

Backup Application

Dump Feature Application
