# ADD A **TOUCH OF COLOUR** To Your HVAC System with the THM-0600

The THM-0600 is a 4 stage fully programmable P.I.D. thermostat for hydronic heating and cooling systems. The large, full graphic display is easy to read and simple to navigate using the touch screen control. When connected to the internet with the Wi-Fi zoning system, the HBX SensorLinx mobile app allows you to control the thermostat remotely anytime, anywhere.

## Features

- Remote Access via the HBX SensorLinx App
- 2 Wire Thermostat (Power and Communication)
- Multiple Heating and Cooling Modes
- Auto Changeover
- Zone Priority
- Humidity Control
- Large, Full Color Graphic Touch Display
- Easy Programming Menus
- Programmable with 4 Different Setback Options
- Damper Control
- External sensor with 10' lead included

Control Systems Inc.

# THM-0600 Functionality

## Easy Installation

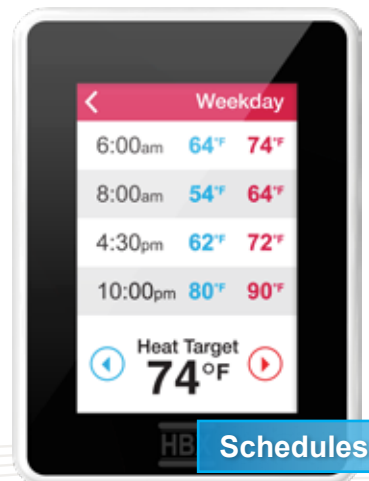

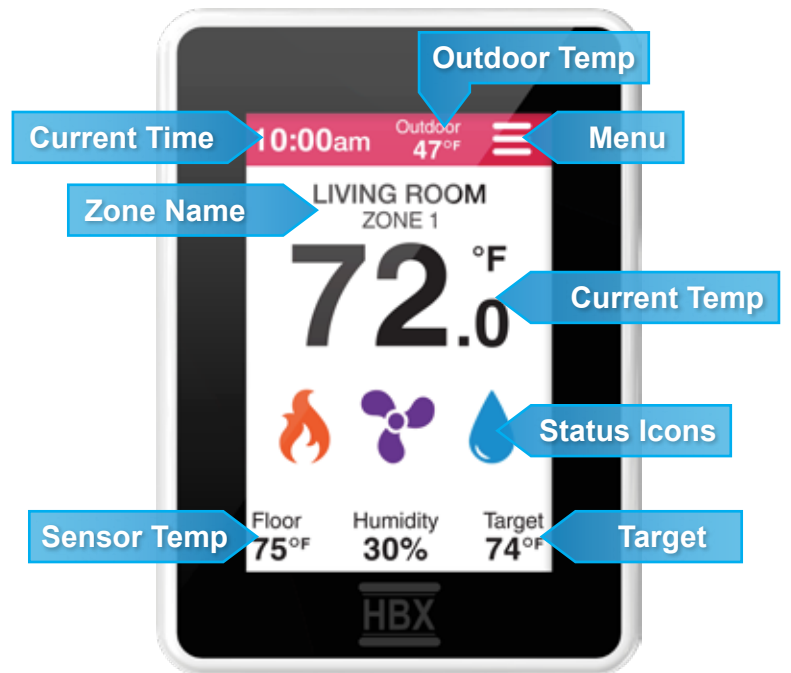

The THM-0600 is designed to work only with the HBX Wi-Fi Zoning System and utilizes only two wires (power and communication) to the ZON-0600 zone control. This eliminates the need to pull wire which makes it ideal for retrofits as well as new installations. The thermostat has two auxiliary sensor inputs that can be used for internal room, external floor or outdoor sensing options. The thermostat includes a universal external sensor with a 10" lead.

## Humidity Control

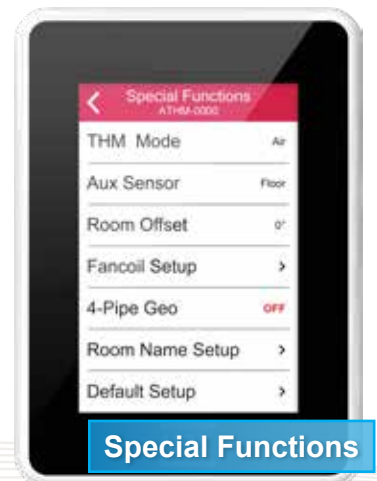

The THM-0600 incorporates a built-in humidity sensor for humidity control. Auto humidity allows the thermostat to humidify or dehumidify to the target % automatically based on the outdoor temperature. No manual adjustment is required. The zoning system must be connected to a wifi network for this feature to be applicable

## Schedules/Away Mode

Program your heating and cooling system around your schedule. With four (4) different schedule options you can be comfortable anytime of the day. Away mode will override the schedule to lower the temperature and increase energy savings.
