ZDN-0550

Wi-Fi™ Zoning System

Out Now!

The Wi-Fi Zoning System offers the highest degree of comfort management, allowing you to control up to 20 zones remotely to maximize comfort and energy savings. The system incorporates multiple heating and cooling modes, DHW, and selectable priorities to accommodate for small to larger systems. Unique to Hydronics, each zone control provides (W, Y, G) outputs for air delivery systems. Each zone can be viewed or configured from smartphone or tablet devices, allowing you to control your comfort anytime, anyplace.

The system incorporates a zone control, 2 wire thermostats, Wi-Fi communication module and mobile app for Apple® and Android™ devices.

Take Control of Your Comfort

More than a standard zone control, the ZON-0550 has the capability to control up to 4 zones plus fancoil control (W,Y, G), with expansion of up to 4 additional zone units that communicate wirelessly, for a maximum of 20 zones.

Designed for quick and simple installation, the ZON-0550 connects to a 2 wire THM-0300 programmable thermostat making it ideal for retrofits as well as new installs.

The system is also capable of controlling air delivery systems with the ability to control fancoils and damper zones. For Geothermal systems, you can control 2 or 4 pipe systems with the Geo Mode feature.

Control Comfort, Away From Home

Free to download for both Apple® and Android™, the HBX Zone app makes comfort easy by allowing you to remotely monitor and adjust targets, schedules, alarms, and modes. The app also provides the capability to control comfort for multiple locations in real time.
